Web Guides: Monitoring and Knowledge - Cover Story for October 2021 Edition of PFFC

Press Release

Roll-2-Roll Technologies Sensors

Page 4

The October 2021 Edition of Paper, Film & Foil Converter Magazine featured the article "Web Guide: The Evolution of Monitoring and The Need for Knowledge". The article written by Pedro P Velasco, COO of Roll-2-Roll Technologies is the cover story of this edition. Web detection has advanced to new sensor technologies with smaller footprint, multiple application capacity and greater sensing range. The future of web guiding requires the dissemination of knowledge through the industry.

The article presents the recent advances in web sensing for guiding, width measurement and other monitoring applications.
