

## Updated Web Guiding Technology Should Also Be Affordable

Stop worrying about routine maintenance, or trying to find outdated spare parts or fight with leaky and noisy workplace with the pneumo-hydraulic units. Roll-2-Roll Retrofit Kit enables you to replace outdated technology with the latest in web edge sensing and control. By keeping the existing web guide mechanical assembly while replacing the sensor, controller and actuator with this retrofit kit any web guide, displacement, steering, unwind or rewind, can be upgraded to the latest technology at a fraction of the cost compared to a completely new unit.

### GENERAL SPECIFICATIONS

<b>Stroke</b>	Up to $\pm 75$ mm	<b>Sensor</b>	WPS 48, 221, 440
<b>Motor</b>	Linear hybrid stepper	<b>Controller</b>	SCU5
<b>Maximum Speed</b>	Up to 75 mm/sec	<b>Operator Interface</b>	Touchscreen language independent
<b>Maximum Thrust</b>	Upto 1800 N	<b>Motor Driver</b>	Microstepping driver
<b>Mounting Option</b>	Direct, rod eye, clevis	<b>Servo center</b>	Included

### BENEFITS

- **Save money** and keep the old web guide assembly while reaping the benefits of new web guiding technology
- **Save space** and remove all the old pneumatic, hydraulic and electromechanical systems
- **Save time** with replacement of old technology that require routine maintenance and spare parts inventory
- **Reduce waste** with high accuracy and high precision guiding
- **Reduce downtime** with parts that are quick, easy to replace and install
